DETAILED ACTION

Claims 1-34 are currently pending in this application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

Lack of Unity Requirement

Claims 1-34 are drawn to more than one inventive concept (as defined by PCT Rule 13), and accordingly, a restriction is required according to the provision of PCT Rule 13.2.

PCT Rule 13.2 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (requirement of unity of invention).

PCT Rule 13.2 states unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Annex B, Part 1 (b), provides that "special technical features" mean those technical features, which, as a whole, define a contribution over the prior art.

Annex B, Part 1 (e), provides combinations of different categories of claims and states:

"The method for determining unity of invention under Rule 13 shall be construed as permitting, in particular, the inclusion of any one of the following combinations of claims of different categories in the same international application:

(i) in addition to an independent claim for a given product, an independent claims for a process specially adapted for the manufacture of the said product, and an independent claim for use of the said product, or

Application/Control Number: 10/560,230 Page 3

Art Unit: 1626

(ii) in addition to an independent claim for a given process, an independent claim for an apparatus or means specially designed for carrying out the said process, or

(iii) in addition to an independent claim for a given product, and independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for an apparatus or means specially designed for carrying out the said process...."

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Due to the numerous variables in the claims, e.g. R¹, R², R³, R⁴, A, B, R⁵, n, m etc. and their widely divergent meanings, a precise listing of inventive groups cannot be made. *The following groups are exemplary*:

Group I claim(s) 1-30 (in part), are drawn to a compound of formula (I) wherein: \mathbb{R}^4 is substituted or unsubstituted phenyl and all other variables are as defined in claim 1, classified in various subclasses in class 548.

Group II claim (s) 1-30 (in part), are drawn to a compound of formula (I) wherein: \mathbf{R}^4 is substituted or unsubstituted pyrrolyl and all other variables are as defined in claim 1, classified in various subclasses in class 548.

Group III claim(s) 1-30 (in part), are drawn to a compound of formula (I) wherein:

R⁴ is substituted or unsubstituted piperidinyl and all other variables are as defined in claim 1, classified in various subclasses in class 546.

Group IV claim(s) 1-30 (in part), are drawn to a compound of formula (I) wherein: \mathbb{R}^4 is substituted or unsubstituted morpholino and all other variables are as defined in claim 1, classified in various subclasses in class 544.

Group V claim(s) 31 and 32 (in part), are drawn to a method of use for compounds of formula (I) wherein: \mathbb{R}^4 is substituted or unsubstituted phenyl and all other variables are as defined in claim 1, classified in various subclasses in class 514.

Group VI claim(s) 31 and 32 (in part), are drawn to a method of use for compounds of formula (I) wherein \mathbf{R}^4 is substituted or unsubstituted pyrrolyl and all other variables are as defined in claim 1, classified in various subclasses in class 514.

Group VII claim(s) 31-32 (in part), are drawn to a method of use for compounds of formula (I) wherein: \mathbb{R}^4 is substituted or unsubstituted piperidinyl and all other variables are as defined in claim 1, classified in various subclasses in class 514.

Group VIII claim(s) 31 and 32 (in part), are drawn to a method of use for compounds of formula (I) wherein: R⁴ is substituted or unsubstituted morpholinyl and all other variables are as defined in claim 1, classified in various subclasses in class 514.

Group IX claim(s) 33 and 34 (in part), are drawn to a process for preparing a mitotic kinesin Eg5 inhibitor or an antitumor agent using compounds of formula (I)

Art Unit: 1626

wherein: R⁴ is substituted or unsubstituted phenyl and all other variables are as defined in claim 1, classified in various subclasses in class 514.

Group X claim(s) 33 and 34 (in part), are drawn to a process for preparing a mitotic kinesin Eg5 inhibitor or an antitumor agent using compounds of formula (I) wherein R⁴ is substituted or unsubstituted pyrrolyl and all other variables are as defined in claim 1, classified in various subclasses in class 514.

Group XI claim(s) 33 and 34 (in part), are drawn to a process for preparing mitotic kinesin Eg5 inhibitor or an antitumor agent using compounds of formula (I) wherein: R⁴ is substituted or unsubstituted piperidinyl and all other variables are as defined in claim 1, classified in various subclasses in class 514.

Group XII claim(s) 33 and 34 (in part), are drawn to a process for preparing a mitotic kinesin Eg5 inhibitor or an antitumor agent using compounds of formula (I) wherein: \mathbf{R}^4 is substituted or unsubstituted morpholinyl and all other variables are as defined in claim 1, classified in various subclasses in class 514.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, **this list is not exhausted**, as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, applicant may choose to elect a

Application/Control Number: 10/560,230

Art Unit: 1626

single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and examiner will endeavor to group the same. If applicant is unable to elect a single invention, applicant may instead choose to elect a specific compound and examiner will attempt to group it. The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art (See, RN 462106-02-1, for example). The

$$\begin{array}{c}
R^{3} \\
0 = N - N \\
R - A + S - N - R^{3} \\
R^{4} - S - R^{2}
\end{array}$$
(1)

compounds claimed contain

, which does not define a contribution

Page 6

over the prior art. The compounds vary in classification and when taken as a whole result in vastly different compounds. Accordingly, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.

Advisory of Rejoinder

The following is a recitation of M.P.E.P. 821.04, Rejoinder:

Where product and process claims drawn to independent and distinct inventions are presented in the same application, applicant may be called upon under 35 U.S.C. 121 to elect claims to either the product or process. See MPEP § 806.05(f) and § 806.05(h). The claims to the nonelected invention will be withdrawn from further consideration under 37 CFR 1.142. See MPEP § 809.02(c) and § 821 through § 821.03. However, if applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims which depend from or otherwise include all the

Application/Control Number: 10/560,230

Art Unit: 1626

limitations of the allowable product claim will be rejoined.

Where the application as originally filed discloses the product and the process for making and/or using the product, and only claims directed to the product are presented for examination, when a product claim is found allowable, applicant may present claims directed to the process of making and/or using the patentable product by way of amendment pursuant to 37 CFR 1.121. In view of the rejoinder procedure, and in order to expedite prosecution, applicants are encouraged to present such process claims, preferably as dependent claims, in the application at an early stage of prosecution. Process claims which depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance. Amendments submitted after final rejection are governed by 37 CFR 1.116. Process claims which do not depend from or otherwise include the limitations of the patentable product will be withdrawn from consideration, via an election by original presentation (see MPEP § 821.03). Amendments submitted after allowance are governed by 37 CFR 1.312. Process claims which depend from or otherwise include all the limitations of an allowed product claim and which meet the requirements of 35 U.S.C. 101, 102, 103, and 112 may be entered.

Page 7

Where product and process claims are presented in a single application and that application qualifies under the transitional restriction practice pursuant to 37 CFR 1.129(b), applicant may either: (A) elect the invention to be searched and examined and pay the fee set forth in 37 CFR 1.17(s) and have the additional inventions searched and examined under 37 CFR 1.129(b)(2); or (B) elect the invention to be searched and examined and not pay the additional fee (37 CFR 1.129(b)(3)). Where no additional fee is paid, if the elected invention is directed to the product and the claims directed to the product are subsequently found patentable, process claims which either depend from or include all the limitations of the allowable product will be rejoined. If applicant chooses to pay the fees to have the additional inventions searched and examined pursuant to 37 CFR 1.129(b)(2) even if the product is found allowable, applicant would not be entitled to a refund of the fees paid under 37 CFR 1.129(b) by arguing that the process claims could have been rejoined. 37 CFR 1.26(a) states that "[T]he Commissioner may refund any fee paid by mistake or in excess of that required. A change of purpose after the payment of a fee...will not entitle a party to a refund of such fee..." In this case, the fees paid under 37 CFR 1.129(b) were not paid by mistake nor paid in excess, therefore, applicant would not be entitled to a refund. In the event of rejoinder, the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101,102, 103, and 112. If the application containing the rejoined claims is not in condition for allowance, the subsequent Office action may be made final, or, if the application was already under final rejection, the next Office action may be an advisory action. Form paragraphs 8.42 through

Art Unit: 1626

8.44 should be used to notify applicant of the rejoinder of process claims which depend from or otherwise include all the limitations of an allowable product claim. In the event of rejoinder, the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104 - 1.106. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. If the application containing the rejoined claims is not in condition for allowance, the subsequent Office action may be made final, or, if the application was already under final rejection, the next Office action may be an advisory action.

The following is a recitation from paragraph five, "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai, In re Brouwer* and 35 U.S.C. §103(b)" (1184 TMOG 86(March 26, 1996)):

"However, in the case of an elected product claim, rejoinder will be permitted when a product claim is found allowable and the withdrawn process claim **depends from or otherwise includes all the limitations of** an allowed product claim. Withdrawn process claims not commensurate in scope with an allowed product claim will not be rejoined." (emphasis added)

Therefore, in accordance with M.P.EP 821.04 and In re Ochiai, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims with process claims commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until, such time, a restriction between product claims and process claims is deemed proper. Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution to maintain either dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder**.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
